Bead Sizes

Metric is the name of the game when it comes to beads. Beads come from all over the world and since the metric system is used everywhere, beads are measured in millimeters, more often than not. If you never wore a lab of metric, here are simple charts to help you make the transition. Be sure to keep your charts handy when buying beads. Non-Snazzycat.com Photos can often distort the size of a bead.

Seed Beads Per Inch
Use these approximate counts of seed beads per inch to help plan your own designs.

Bead Size	Beads per inch
110	20
80	12
